

Edvance Working Group: Building a Professional Learning Plan 2024/25

Ever feel like you're scrambling to plan an upcoming PD day? This group is for you. The recently released Edvance Flourishing Schools Health Indicators Dashboard includes the following health indicator in the "Vision" domain: "School has a professional learning plan in place that pursues the mission and vision with the staff." The dashboard also includes some templates to help you accomplish the indicator.

This working group is for school learning leaders who would like support from Edvance and each other in designing and implementing a staff professional learning plan (PLP) using templates provided. The group will consider your school's identity, strategic priorities, and staff needs as the foundation on which to develop a comprehensive professional learning plan to shape your professional development calendar.

Shared Leadership: Culture and Organizational Trust

For any PLP to be effective, it needs to be accomplished in a culture of organizational trust. What concrete factors impact organizational trust? How can the pursuit of the PLP be a collaborative experience of shared leadership?
